

Environmental Products

Environmentally Sound

Durability and reliability in manufacturing are essential, because high-quality products protect our environment. Whether it's for water, wastewater, or stormwater management and pollution control, Oldcastle Precast delivers state-of-the-art precast concrete, plastic and polymer products with superior quality control.

Delivering Reliability

Providing Quality Products

Oldcastle Precast is your solution for precast environmental products. Stock or specialty design, our knowledgeable team will work with you to find the right combination of products to fit your needs.

For Water

- > Packaged Valve and Water Meter Vaults
- > Packaged Water Booster Stations

For Wastewater

- > Packaged Pump / Lift Stations
- > Septic Systems and Tanks
- > Advanced Onsite Wastewater Systems
- > Wastewater Treatment Plant Systems
- > Grease Interceptors

For Stormwater and Pollution Control

- > Oil Water Separators
- > Hydrodynamic Treatment Products
- > Filtering Products
- > Detention / Retention Products
- > Packaged Pump / Lift Stations

Stormwater Detention

Oil Water Separator

Packaged Valve and Water Meter Vaults and Water Booster Stations

Valve and water meter vaults are outfitted in the controlled environment of our factories and delivered to the jobsite “connection ready”, increasing speed of installation, and eliminating many of the quality and safety issues associated with field construction. For all of our valve and water meter vaults, Oldcastle Precast’s trained technicians assemble all internal piping, valve and meter components and perform hydrostatic testing to ensure the assembled components are watertight prior to delivery. For our water booster stations our trained technicians assemble all plumbing, climate control equipment, pumps, and electrical, in addition to providing interior wall coverings and a variety of aesthetically pleasing exterior finishes for above ground structures.

Septic Systems, Tanks and Advanced Onsite Wastewater Systems

We have a wide variety of tanks and systems available for the commercial and cluster-housing markets. Manufactured to meet local codes, systems range from turn-key “green” commercial systems (go to www.oldcastleprecastonsite.com), to packaged dosing tanks (with pumps and controls), to large wastewater holding tanks, to multi-compartment and individual septic tanks. Oldcastle Precast’s decades of experience in the wastewater market enables us to solve your wastewater needs effectively and efficiently.

Environmental Products

Valve Vault

Pump Station

Holding Tank

Onsite Wastewater Treatment

Water Booster Station

Packaged Pump / Lift Stations

Oldcastle Precast provides a range of turn-key precast modular submersible pump stations to meet your requirements quickly with the most durable long-term solutions. Our factory authorized technicians assure the stations are outfitted and working to customers' satisfaction. Complete with controls, wiring, plumbing, and pumps, we offer unequalled value and experience in the design, fabrication and delivery of advanced precast structures.

Wastewater Treatment Plant Systems

Oldcastle Precast manufactures standard and custom components for wastewater treatment plants. Cast in controlled factory environments, precast components are high quality and can be cast in advance of your jobsite schedule to significantly speed up the project and get the plant online faster. Products include modular concrete clarifier panels, launder troughs, modular precast control buildings, packaged lift stations, and packaged valve vaults.

Grease Interceptors

Grease is a villain! It clogs sewer systems and severely restricts the efficiency of treatment plants. But a grease interceptor from Oldcastle Precast effectively combats grease. Our unique configuration of baffles and openings – developed from extensive trials, test runs, and in-house hydraulic analyses – removes grease from effluent and contains it. Our design also promotes even-flow conditions for optimum performance. Oldcastle Precast has a range of standard sizes available that includes traffic-rated models.

Oil Water Separators

Contamination of our water resources with hydrocarbons is an especially difficult problem to solve because of the widespread use of petroleum products. Oldcastle Precast offers a variety of oil/water separators to intercept grease and oil in storm water runoff. We offer two styles of separators, the generic baffled style for lower concentration areas and, for hydrocarbon "hot spots" we provide separators that use enhanced coalescing plate technology and gravitational separation to improve the separation process and reduce the frequency of maintenance and cleaning.

Stormwater Hydrodynamic Treatment Products

Oldcastle Precast is one of the largest manufacturers of precast hydrodynamic stormwater treatment devices in the United States. We manufacture and outfit many proprietary structures for companies like Contech, CrystalStream, Hydro International, Imbrium Systems, Modular Wetlands, Suntime Technologies, Baysaver and others.

Stormwater Filtering Products

When stormwater requires more than hydrodynamic treatment, we manufacture a variety of proprietary stormwater filtering devices for companies like Contech, Imbrium Systems, and others. In addition, we manufacture and sell non-proprietary sandfilters for stormwater treatment.

Stormwater Detention / Retention Products

Oldcastle Precast manufactures many products to detain runoff so it can be released in a controlled manner to prevent stream erosion or peak flows to CSOs. Structures are also used to retain stormwater for treatment purposes and/or for water reuse.

Delivering Reliability

Oldcastle Precast

Oldcastle Precast is the leading manufacturer of precast concrete, plastic and polymer products in the United States. With more than 80 locations nationwide, our products are always close at hand. Our 5,000 employees are committed to upholding core values of reliability, quality and service in revolutionary ways. Our attention to detail exceeds the expectations of customers from some of the largest companies in the U.S., across a spectrum of industries.
